EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with J. Derek Mason on December 5, 2003.

The application has been amended as follows:

IN THE CLAIMS

Claim 12, lines 1-2, the words "organic compound is" has been amended to the words -- oxidized species are --.

Claim 15, line 2, the word -- anode -- has been inserted after the word "felt".

Claim 18, lines 1-2, the words "organic compound is both reduced and oxidized at" has been amended to the words -- electrode is --.

Claim 21, line 6, the word -- given -- has been inserted after the word "same".

Claim 22, line 6, the word -- given -- has been inserted after the word "same".

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims **12-17 and 19-21** are allowable over the prior art of record because the prior art does not teach or suggest a process for the electrolytic transformation of at least one organic compound in an electrolysis cell comprising the steps of oxidizing and reducing as presently claimed, esp., the step of reducing the oxidized species at the same electrode of the electrolysis cell having the same given polarity.

Claims **18 and 22-24** are allowable over the prior art of record because the prior art does not teach or suggest a process for the electrolytic transformation of at least one organic compound in an electrolysis cell comprising the steps of reducing and oxidizing as presently claimed, esp., the step of oxidizing the reduced species at the same electrode of the electrolysis cell having the same given polarity

The prior art does not contain any language that teaches or suggests the above. *Chernyshev et al.*, *Cleghorn et al.* and *Oberrauch et al.* do not teach that both oxidation and reduction occur at the same electrode having the same given polarity. Therefore, a person skilled in the art would not have been motivated to adopt the above conditions, and a prima facie case of obviousness cannot be established.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
